Appl. No. 10/814,609 Amdt. Dated 8 November 2006 Reply to Office action of 8 September 2006

Amendment To The Specification

Please amend the abstract as indicated below.

A method and/or system using a nanogap capacitor-device <u>exposes molecules to a plurality of nano-gaps between electrodes and uses dielectric properties of the nanogap to detect the presence and/or conformation of substances of interest. Methods for construction constructing nanogap devices use a single layer directly between two electrically conducting layers.</u>
